10. VIDEO

10.1 Video. This Section 10 applies to our video-first customer engagement platforms and

video services (“**Video Service**”) as standalone services or as an integrated or associated part of other products provided by us or our Affiliates.

10.2 Service and User Roles. The Video Service distinguishes between five user roles. Each role has different authorization rights and various levels of access to information: (i) “**Administrators**” have full access to the system and all functionalities of the Video Service; (ii) “**Users**” are individuals authorized by Administrators who can schedule and manage their own sessions and can see reviews left by Guests; (iii) “**Managers**” have the same permissions as Users, provided that they can also schedule sessions on behalf of other Users; (iv) “**Planners**” can schedule and manage sessions for Users but can not do sessions themselves; and (v) “**Guests**” are individuals authorized to join sessions by Administrators, Users, Managers, and/or Planners. You are responsible for assigning user roles and managing the use of the Video Service according to those roles.

10.3 Services Fees. Unless otherwise specified on the Order Form, one-off Service Fees relating to the set-up and installation of the Video Service are due and payable immediately upon signing of the relevant Order Form. The monthly subscription Service Fees will apply from the date the Video Service is made available to you.

10.4 Independent Customer Terms and Conditions. The Video Service enables you to make your own terms and conditions available to Guests, which apply only to the relationship between you and your Guests. When you enter into an agreement with a Guest via a video session (“**Session**”) using the Video Service, we do not become a party to such agreement.

10.5 Use Restrictions. You may not frame or utilize framing techniques to enclose any of our intellectual property rights without our express written consent. You may not use any meta tags or any other “hidden text” utilizing our intellectual property rights without our express written consent.

10.6 Fair use. A Customer may use functionalities within the Video Service that are delivered through a third-party provider, including usage of international telephone numbers (“**Third-Party Functionality**”). These Third-Party Functionalities are not included in the Video Service licensing fee. In the event that the Customer’s usage of the Third-Party Functionalities exceeds 5% of the monthly Video Service licensing fee, we may bill these fees directly to the Customer. The Customer shall pay the fees in accordance with the Agreement.

10.7 Recordings.

10.7.1 The functionality for recording, storing, downloading and deleting video calls can be made available by us on request by Customer.

10.7.2 Customer is responsible for compliance with all applicable laws and regulations to Customer’s use of the video call recording functionality, including data protection laws and intellectual property rights.

10.7.3 A file will be created during the (video) call which contains the selected content of the video call.

10.7.4 Video call recordings can be stored with us, or on premise with the Customer. Depending on the type of storage, the following applies:

10.7.4.1 With us: The file will be encrypted and stored in a designated folder on the cloud server used by us. The file can be downloaded directly by Customer in MP4 format through a secured connection. This storage lasts until the moment the Customer chooses to delete the file or until the Customer terminates the Agreement, whichever is sooner.

10.7.4.2 Transferring from us to external storage: Transferring of the files to the Customer is done through Customer's transfer mechanism of choice. We will count the transfer as successful once it has initiated the transfer of the file, using the Customer's transfer mechanism of choice and storage location of choice. Due to external factors (such as availability and updates of the Customer's transfer mechanism and storage location of choice) we cannot guarantee the successful transfer of the file from us to the Customer's storage location of choice. We therefore offer Customer to keep a back-up of the file(s) in our encrypted storage, before deleting the file(s) held by us. We will keep the back-ups with due care and diligence. Upon request of the Customer, we can also retain the file(s) in back-up until the Customer has confirmed to us that a file is transferred successfully. In this situation Customer is fully responsible for quality assurance of the video call recordings and to make sure that this confirmation is correct.

10.7.5 In case Customer uses manual recordings (where recordings may be started/stopped manually in the video call) the source data from us is leading in identifying when the recording started/stopped.

10.7.6 We are not liable for any loss / deletion of video call recordings. We are not liable for any claims from Administrators, Users, Managers, Planners and/or Guests regarding the video call recordings.

10.7.7 Customer is responsible to inform their Guests that the video call is being recorded and stored, taking into account the information obligations under the data protection laws. Notwithstanding the foregoing, you should notify and obtain the necessary authorization from your end-users and comply with all information, notification, retention, access and other applicable requirements prescribed by applicable laws. We assume no responsibility when Customer fails to do so.

10.7.8 Prohibited Use: Customer agrees that it will not use, and will not permit any Administrator, User, Manager, Planner and/or Guest to use the Services in violation of any of our terms or in a manner that violates applicable laws and regulations, including but not limited to, anti-spam, export control, privacy, and anti-terrorism laws and regulations and laws requiring the consent of subjects of audio and video recordings. Customer also agrees to be solely responsible for compliance with all such laws and regulations.

10.8 Conversation Intelligence.

10.8.1 The functionality for conversation intelligence can be made available by us on request of the Customer. Conversation intelligence converts the recording of a video call into a text file. This text file can be further analyzed with optional add-on functionality including the goal tracker that checks if key topics have been discussed in the conversation.

10.8.2 In order to utilize this functionality, Customer agrees to the following: (a) use of our subprocessor Google Cloud to process the audio tracks of the conversations; and (b) use of the recording functionality of the Video Service as listed under the Section 10.7 (Recordings) above.
